PIANOGLOSS™

TEXTURED

MOMA

SOLID

POWDER MATT is soft like powder, inviting the touch of seasoned hands. With its sophisticated appeal and remarkable versatility, the surface works as both an accent and a complement.

MATT is a refined functional finish that does not compromise on its surface texture.

- Yellow core** is now available for light decors to noticeably and affordably reduce join lines, without compromising on good design.
- Magnetic function** is now available in two decors, transforming surfaces into interactive spaces.

YELLOW CORE Y

We are known as the creators of the **Yellow Core** technology, which we developed to meet the gap between colour core and standard core.

Exclusive to Panaplast, our **Yellow Core** technology solves the challenges presented by unsightly dark seams and gaps in light-coloured laminates. We developed **Yellow Core** at the intersection of colour core and standard core, where there were no high-quality cost-effective solutions available. This clever technology noticeably and affordably reduces lines, without compromising on good design.

 Anti-fingerprint

Intelligently made with German technology for refined spaces, MOMA is a premium technical and decorative surface. Through an advanced electron beam curing process, the surface is extremely matt, soft to touch and is anti-fingerprint. Micro-abrasions on the surface can be thermal repaired, made to retain its understated elegance for the long-term.

WHITE CORE

COLOUR CORE

MELAVAIO® is made by layering several sheets of specialised core paper which matches the surface decor. The result is a homogeneous material that creates impossibly seamless joins. Matt decors are smooth to touch, for an indulgent and luxurious finish. Crafted in Japan, the material is phenol free and environmentally friendly.

TIMBER

Our **TIMBER** collection is inspired by travels and contemplative walks through primeval forests, seeking to bring nature into spaces. Walnut, oak, birch and teak brush up again a palette of enduring colours. Together with intricate grains and tactile textures, these designs resemble the natural aesthetics of timber. The collection is made to complement a number of environments, materials and light.

Y Yellow core is now available for light decors to noticeably and affordably reduce join lines, without compromising on good design.
